

The Preferred Stock Playbook

TERMS AS OF OCT 4, 2026

STRC, STRK, STRF, STRD & SATA explained: how each works, how the rates move, who gets paid first, and what can go wrong.

What a perpetual preferred is

A share that sits between debt and common stock. It pays a set dividend on a **\$100 stated amount**, has **no maturity date**, and usually doesn't share in the upside of the common. Strategy calls its preferreds "Digital Credit", and sale proceeds have helped fund its bitcoin buying.

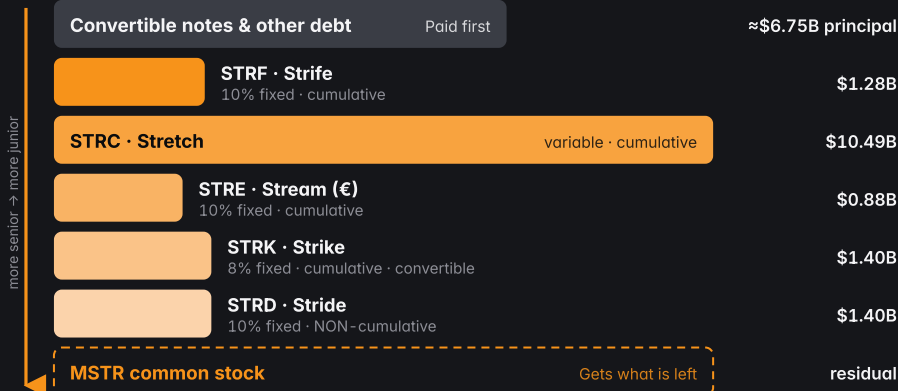

Stated rate vs. what you earn

The rate is paid on **\$100**, not on the price you pay. Buy at \$90 and a 10% stated rate is \$10 a year, about 11.1% on your cost. Buy at \$110 and it is about 9.1%. Prices move every day, so check the live quote before doing the math.

1 Who gets paid first: the capital stack

RANKING PER 10-Q ²

STRATEGY · RANK IN A LIQUIDATION · AGG. LIQUIDATION PREF., JUN 30, 2026

STRIVE · RANK

Any debt ranks ahead of SATA

SATA \$783.0M liq. pref., Jun 30, 2026

ASST Class A & B common residual

12,193,180 SATA shares outstanding on Sep 25, 2026 ⁵

Why it matters: in a wind-down, each layer is paid in full before the next gets anything. Strategy's debt ranks ahead of all its preferreds; STRD is the most junior preferred. ²

Bar length ∝ aggregate liquidation preference on Jun 30, 2026 (10-Q). Figures change as shares are sold or repurchased: e.g. Strategy bought back 1,534,530 STRC shares in the week to Sep 27, 2026 ³. Debt ≈ \$6.75B aggregate principal, excluding intercompany, Jun 30, 2026.

2 How variable rates move

Trading below par

issuer can hold or raise the rate

Trading above par

issuer can cut, within limits

- **STRC and SATA** rates are reset by the issuer each period. Strategy says it will keep STRC at 12.00% until it shows "sustained, healthy trading near \$100".¹ Strive aims to keep SATA between \$99 and \$101.⁶
- **Limits on cuts** (both): no more than 0.25 pt plus any drop in 1-month SOFR in one period, and never below 1-month SOFR.²⁶

3 Dividend math on \$100

TICKER	RATE	PER PAY	WHEN	SOURCE
STRC	12.00% ÷ 24 periods	\$0.50	semi-monthly	8-K Oct 1, 2026 ¹
SATA	13.00%, Oct 2026	\$0.0516	each business day (\$1.0836 for Oct)	8-K Sep 15, 2026 ⁴
STRF	10.00% ÷ 4	\$2.50	quarterly	derived from 10-Q terms ²
STRK	8.00% ÷ 4	\$2.00	quarterly (cash and/or stock)	derived ²
STRD	10.00% ÷ 4	\$2.50	quarterly, only if declared	derived ²

4 Five questions before you buy a preferred

1

What is the current rate, and is it fixed or variable?

2

What price am I paying vs. the \$100 stated amount?

3

Cumulative or non-cumulative?

4

Where does it rank, and how much sits ahead of it?

5

Can the issuer redeem it, and at what price?

5 Each preferred on one card

STATED TERMS · 10-Q² · 8-KS^{1,4}

STRC

STRATEGY

Variable Rate Series A Perpetual Stretch Preferred

Rate	12.00% CHECK CURRENT RATE
Pays	Semi-monthly (15th & month-end record dates)
Cumulative	Yes
First issued	Jul 29, 2025 at \$90.00
Redemption	Strategy may redeem at \$101
Watch	Daily record dates proposed; vote Oct 28, 2026 ¹

STRF

STRATEGY

10.00% Series A Perpetual Strife Preferred

Rate	10.00% fixed
Pays	Quarterly: Mar 31, Jun 30, Sep 30, Dec 31
Cumulative	Yes, cash only
First issued	Mar 25, 2025 at \$85.00
Rank	Most senior Strategy preferred
Extra	Board rights if dividends go unpaid

STRK

STRATEGY

8.00% Series A Perpetual Strike Preferred

Rate	8.00% fixed
Pays	Quarterly, in cash, MSTR stock or both
Cumulative	Yes
First issued	Feb 5, 2025 at \$80.00
Convertible	0.1 MSTR share per STRK, any time
Watch	Price partly tracks MSTR

STRD

STRATEGY

10.00% Series A Perpetual Stride Preferred

Rate	10.00% fixed
Pays	Quarterly, only if declared
Cumulative	No: skipped dividends are lost
First issued	Jun 10, 2025 at \$85.00
Rank	Most junior Strategy preferred
Watch	Non-cumulative and last in line

SATA

STRIVE

Variable Rate Series A Perpetual Preferred

Rate	13.00% for Oct 2026 CHECK CURRENT RATE
Pays	Oct 2026: \$0.0516 each business day
Cumulative	Yes; unpaid amounts compound monthly
Target	Trade between \$99 and \$101
Redemption	Strive may redeem at \$110
Rank	Ahead of ASST common, behind debt

STRE

STRATEGY

10.00% Series A Perpetual Stream Preferred (euro)

Rate	10.00% fixed, paid in euros
Pays	Quarterly
Cumulative	Yes
First issued	Nov 13, 2025 at €80.00
Listed	Luxembourg Stock Exchange
Rank	Below STRC, above STRK

6 Risks to understand before buying any preferred

Price risk

Preferreds trade daily and can fall well below \$100 when bitcoin, rates or the issuer's credit weaken. "Par" is not a floor.

Rate-cut risk

STRC and SATA rates can be lowered (within the limits). Your income can change month to month.

Dividend risk

Dividends are declared by the board. STRD dividends that are skipped are never owed. Cumulative ones build up, but are not paid on schedule.

Subordination

All preferreds rank behind the issuer's debt; STRD is last among Strategy's preferreds; all rank ahead of common.

No maturity · call caps

Perpetual: there is no date when you get \$100 back. Redemption rights (STRC \$101, SATA \$110) can cap the upside.

Tax treatment

Both issuers currently expect dividends to be treated as return of capital. That depends on future earnings and can change. Ask a tax pro.

Dates on the calendar

- Oct 1–30, 2026: SATA pays \$0.0516 per share each business day⁴
- Oct 15, 2026: STRC record date for the \$0.50 paid Oct 31¹
- Oct 28, 2026: Strategy special meeting on daily dividend record dates¹
- Dec 31, 2026: next quarterly date for STRF, STRK, STRD²

Dividends must be declared by each board; schedules can change.
